

## XENEC STROBE LIGHT SL-15

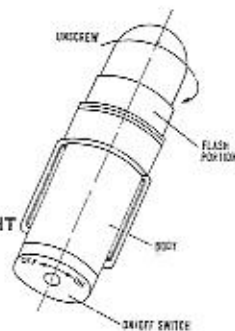

This xenon tube personal identification signal flash light emits continuously strong flashes, particularly bright at night or at dusk. It can be seen from a distance of 3.4 kilo-meter away. It is specially designed to be water-proof and can be used under water to a depth of 50 meters.

### BATTERY LOADING

- Unscrew the transparent flash portion from the body.
- Load one "C" size 1.5V battery into the body with the positive polarity facing upward. Alkaline battery is recommended for longer operation.
- Screw in tightly the transparent flash portion to the body.

### SWITCH ON/OFF THE XENEC STROBE LIGHT

- The ON/OFF switch at the bottom is a magnetic type and separated completely from the main body. Turn clockwise to ON and reverse to OFF, even under water. After using under water, a few shakes will remove any residual water trapped inside the switch cap.
- Turn the switch to the ON position, the flash unit will continuously flash for about 15 hours, starting at about one flash per second and gradually decreases to one flash per three seconds.
- Switch off the flash unit when it is not in use.

### CAUTIONS

- Although the Xenec Strobe Light is ruggedly built, the glass tube inside can be broken under certain high impact. Please do not throw the unit against any hard object or floor.
- Remove the battery when the Xenec Strobe Light will not be used for a long period of time.
- Before going out for any activity with your Xenec Strobe Light, check the unit by switching it on for at least one minute and see whether it is flashing properly. If the battery is weak, replace it with new one and check it again.
- If the flash does not work properly, do not attempt to repair it yourself as it contains high voltage circuitry and should be serviced only by trained personnel.

### SPECIFICATIONS

- |  |  |
|--|--|
| • Visibility<br>(On clear night with unobstructive view) | 3.4 km.                                    |
| • Light Intensity  | 0.75 Candela                               |
| • Water Proof  | 50 meter deep                              |
| • Type   | Arm Strap                                  |
| • Power Source   | Alkaline Battery 1.5V C Type               |
| • Flash Performance                                      | Continuous Flashing for first 15 hrs.      |
| • Switch   | Magnetic Reed Switch outside case          |
| • Measurement  | 39φ x 127mm                                |
| • Weight   | 88 gm without battery (Arm strap included) |
